

SYDE 401 - SYDE Seminar Fall 2022

SYDE401 is a seminar time slot that is used to present relevant information to SYDE 4th year students. There are typically 1-2 seminars presented during the term. On very rare occasions, the 401 time slot may be used for 461 if extra time is required in a particular week.

Seminars will be scheduled as required and an email will be sent to all students to notify you when your attendance is required.

If no seminar has been posted or advertised, there will be no content presented in the SYDE 401 lecture slot and you do not have to attend.

Make sure to regularly check your UW email and LEARN. Any information presented in SYDE 401 as a seminar will be posted here, where appropriate.

If you have any questions feel free to contact Prof. Borland, mjborlan@uwaterloo.ca, at any time.
